

HR ANALYTICS DASHBOARD USING TABLEAU:

Business Problem

Organizations need an efficient way to monitor employee attrition and understand the factors influencing workforce turnover. Traditional reporting methods are time-consuming and often fail to provide actionable insights. A centralized analytics dashboard is required to visualize HR metrics and help management make informed decisions regarding employee retention and organizational performance.

Project Objective

The objective of this project is to build an interactive **Tableau HR Analytics Dashboard** that enables HR teams to:

- Monitor workforce KPIs in real time.
- Track employee attrition and attrition rate.
- Analyze attrition across departments, gender, age groups, and education fields.
- Evaluate job satisfaction across different job roles.
- Support strategic workforce planning using interactive dashboards and filters.

Key Performance Indicators (KPIs)

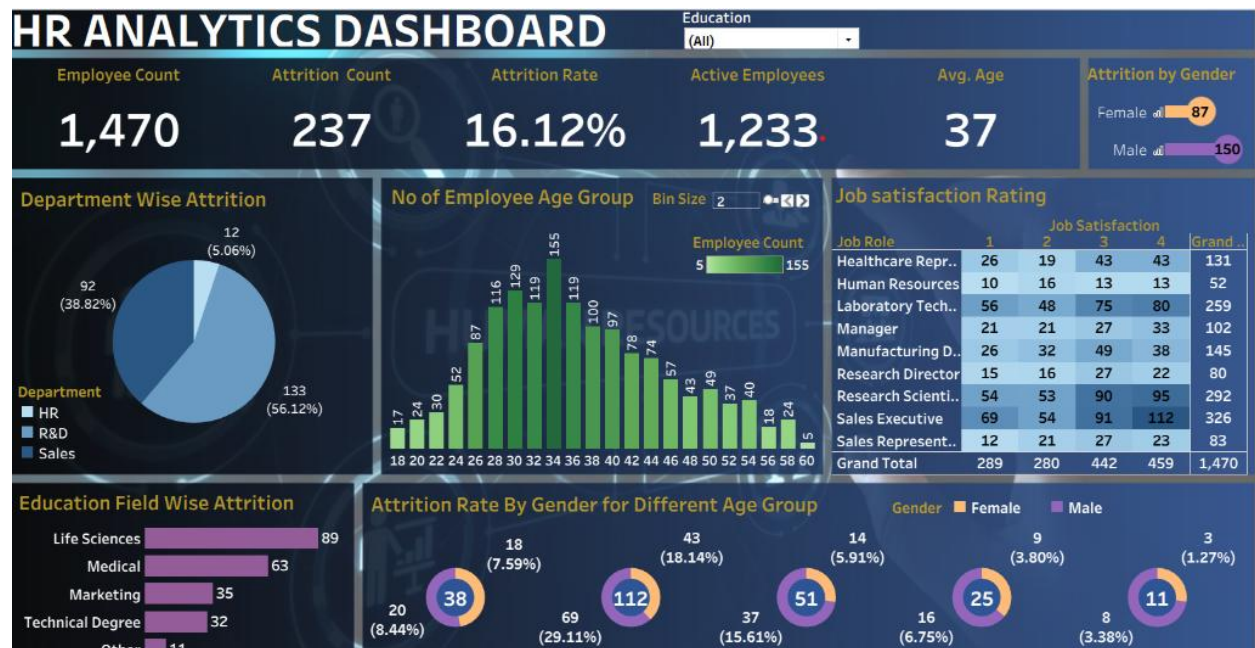

- Total Employees
- Total Attrition
- Attrition Rate (%)
- Active Employees
- Average Employee Age

Dashboard Features

The dashboard provides insights into:

- Department-wise Attrition
- Gender-wise Attrition
- Employee Age Distribution
- Education Field-wise Attrition
- Job Satisfaction Ratings by Job Role
- Attrition by Gender across Different Age Groups
- Interactive Education Filter

OUTCOME:

V
